DETAILED ACTION

Claim Objections

Claim 2 recites the limitation "the light emitting diode" in line 9. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being fully anticipated by USPN 6,065,678 to Li et al. A hand held bar code scanner having a focusing system wherein focusing uses an LED and a two-stage switch that is a press button switch is disclosed by Li et al.

Regarding claim 1, An illuminating device for a hand-held bar code reader (figures 4-6, also see the ABSTRACT),

Comprising a light emitting device controlled by a two-stage switch (column 6, lines 12-18, "Pushbutton 90 is a two-stage switch actuator. In one ON position thereof, LED 12a is energized, i.e., to accomplish the focusing phase. In the other ON position of pushbutton 90, LEDs 78 energized, i.e., to accomplish the scanning phase") wherein when the switch is switched to a first operation stage, the light emitting device is switched on for illuminating a bar code, and when the switch is switched to a second operationstage, a scan light is generated for reading a bar code.

Regarding claim 2, according to claim 1, wherein a hand-held bar code reader includes a reading window (figure 6), and the light emitting diode (12a) is installed next to the reading window (figure 6).

Regarding claim 3, according to claim 1, wherein the light emitting device is operative to emit a light substantially parallel to a scan light generated from an interior of the reading window (column 4, lines 66,67, column 5, lines 1-10).

Regarding claim 4, according to claim 1, wherein the switch includes a press-button switch (90).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure are 5,859,418 to Li et al., 5,744,790 to Li, and 5,684,287 to Walts.
